

## GeoGebra Tutorial: Create Worksheets in GeoGebra Server

1. Go to [www.geogebra.org](http://www.geogebra.org) . Click [Sign in](#) . Sign in with your Google account or create a new GeoGebra account.
2. Click “+ NEW”. Choose “Create Worksheet”.

3. Enter the title of your worksheet. Click “GeoGebra” and “Upload Applet” to upload your ggb file. You can insert more than one applet or even images, videos, PDF files in a worksheet.
4. When your applet appears, click “Advanced Settings...”. Enter suitable width and height. You must enable pan and zoom for 3D applets. Click “Done”.

5. Click “Worksheet Settings”. Choose suitable “Visibility” (Public/ Shared with link/ Private).
6. Click “Save & Close “. You can click “No thanks” when you are asked to provide some tags.
7. You can create a “book” to organize different worksheets. After clicking “Create Book”, enter the title, set the visibility, then click “Save”.
8. Add worksheets and add chapters (if necessary). Click “View Book” when you finish.
