Work of art in the form of a Movie of live images that are rotated to produce an illusion of moving images that are presented as a form of entertainment. The illusion of a Movie of images produces continuous motion in the form of video. The film is often referred to as a Movie or moving picture. Film is a modern and popular art form created for business and entertainment purposes. Film making has now become a popular Fast & Furious Presents: Hobbs & Shaw Season throughout the world, where feature films are always awaited by cinemas. Films are made in two main ways. The first is through shooting and recording techniques through film cameras. This method is done by photographing images or objects. The second uses traditional animation techniques. This method is done through computer graphic animation or CGI techniques. Both can also be combined with other techniques and visual effects. Filming usually takes a relatively long time. It also requires a job desk each, starting from the director, producer, editor, wardrobe, visual effects and others. Definition and Definition of Film / Movie While the players who play a role in the film are referred to as actors (men) or actresses (women). There is also the term extras that are used as supporting characters with few roles in the film. This is different from the main actors who have bigger and more roles. Being an actor and an actress must be demanded to have good acting talent, which is in accordance with the theme of the film he is starring in. In certain scenes, the actor's role can be replaced by a stuntman or a stuntman. The existence of a stuntman is important to replace the actors doing scenes that are difficult and extreme, which are usually found in action action films. Films can also be used to convey certain messages from the filmmaker. Some industries also use film to convey and represent their symbols and culture. Filmmaking is also a form of expression, thoughts, ideas, concepts, feelings and moods of a human being visualized in film. The film itself is mostly a fiction, although some are based on fact true stories or based on a true story. There are also documentaries with original and real pictures, or biographical films that tell the story of a character. There are many other popular genre films, ranging from action films, horror films,

comedy films, romantic films, fantasy films, thriller films, drama films, science fiction films, crime films, documentaries and others. That's a little information about the definition of film or Movie. The information was quoted from various sources and references. Hope it can be useful.

○○○ TV MOVIE ○○○

The first television shows were experimental, sporadic broadcasts viewable only within a very short range from the broadcast tower starting in the 1930s. Televised events such as the 1936 Summer Olympics in Germany, the 1934 coronation of King George VI in the UK, and David Sarnoff's famous introduction at the 1939 New York World's Fair in the US spurred a growth in the medium, but World War II put a halt to development until after the war. The 1940 World MOVIE inspired many Americans to buy their first television set and then in 1948, the popular radio show Texaco Star Theater made the move and became the first weekly televised variety show, earning host Milton Berle the name "Mr Television" and demonstrating that the medium was a stable, modern form of entertainment which could attract advertisers. The first national live television broadcast in the US took place on September 4, 1951 when President Harry Truman's speech at the Japanese Peace Treaty Conference in San Francisco was transmitted over AT&T's transcontinental cable and microwave radio relay system to broadcast stations in local markets.

The first national color broadcast (the 1954 Tournament of Roses Parade) in the US occurred on January 1, 1954. During the following ten years most network broadcasts, and nearly all local programming, continued to be in black-and-white. A color transition was announced for the fall of 1965, during which over half of all network prime-time programming would be broadcast in color. The first all-color prime-time season came just one year later. In 19402, the last holdout among daytime network shows converted to color, resulting in the first completely all-color network season.

○○○ Formats and Genres ○○○

See also: List of genres § Film and television formats and genres Television shows are more varied than most other forms of media due to the wide variety of formats and genres that can be presented. A show may be fictional (as in comedies and dramas), or non-fictional (as in documentary, news, and reality television). It may be topical (as in the case of a local newscast and some made-for-television films), or historical (as in the case of many documentaries and fictional MOVIE). They could be primarily instructional or educational, or entertaining as is the case in situation comedy and game shows.[citation needed]

A drama program usually features a set of actors playing characters in a historical or contemporary setting. The program follows their lives and adventures. Before the 1980s, shows (except for soap opera-type serials) typically remained static without story arcs, and the main characters and premise changed little.[citation needed] If some change happened to the characters' lives during the episode, it was usually undone by the end. Because of this, the episodes could be broadcast in any order.[citation needed] Since the 1980s, many MOVIE feature progressive change in the plot, the characters, or both. For instance, Hill Street Blues and St. Elsewhere were two of the first American prime time drama television MOVIE to have this kind of dramatic structure,[4][better source needed] while the later MOVIE Babylon 5 further exemplifies such structure in that it had a predetermined story running over its intended five-season run.[citation needed] In Fast & Furious Presents: Hobbs & Shaw , it was reported that television was growing into a larger component of major media companies' revenues than film.[5] Some also noted the increase in quality of some television programs. In Fast & Furious Presents: Hobbs & Shaw , Academy-Award-winning film director Steven Soderbergh, commenting on ambiguity and complexity of character and

narrative, stated: "I think those qualities are now being seen on television and that people who want to see stories that have those kinds of qualities are watching television.

○○○ Thank's For All And Happy Watching○○○

Find all the movies that you can stream online, including those that were screened this week. If you are wondering what you can watch on this website, then you should know that it covers genres that include crime, Science, Fi-Fi, action, romance, thriller, Comedy, drama and Anime Movie. Thank you very much. We tell everyone who is happy to receive us as news or information about this year's film schedule and how you watch your favorite films. Hopefully we can become the best partner for you in finding recommendations for your favorite movies. That's all from us, greetings!

Thanks for watching The Video Today. I hope you enjoy the videos that I share. Give a thumbs up, like, or share if you enjoy what we've shared so that we more excited.

Watch Fast & Furious Presents: Hobbs & Shaw Movie WEB-DL This is a file losslessly ripped from a streaming service, such as Netflix, Amazon

Video, Hulu, Crunchyroll, Discovery GO, BBC iPlayer, etc. This is also a movie or TV show downloaded via an online distribution website, such as iTunes. The quality is quite good since they are not re-encoded. The video (H.264 or H.265) and audio (AC3/Fast & Furious Presents: Hobbs & Shaw C) streams are usually extracted from the iTunes or Amazon Video and then remuxed into a MKV container without sacrificing quality.

Download Movie Fast & Furious Presents: Hobbs & Shaw One of the movie streaming industry's largest impacts has been on the DVD industry, which

effectively met its demise with the mass popularization of online content. The rise of media streaming has caused the downfall of many DVD rental companies such as Blockbuster. In July 2015 an article from the New York Times published an article about Netflix's DVD

services. It stated that Netflix is continuing their DVD services with 5.3 million subscribers, which is a significant drop from the

previous year. On the other hand, their streaming services have 65 million members. In a March 2016 study assessing the "Impact of Movie

Streaming over traditional DVD Movie Rental" it was found that respondents do not purchase DVD movies nearly as much anymore, if ever, as streaming has taken over the market.

Watch Movie Fast & Furious Presents: Hobbs & Shaw , viewers did not find movie quality to be

significantly different between DVD and online streaming. Issues that respondents believed needed improvement with movie streaming

included functions of fast forwarding or rewinding, as well as search functions. The article highlights that the quality of movie

streaming as an industry will only increase in time, as advertising revenue continues to soar on a yearly basis throughout the industry, providing incentive for quality content production.

Watch Fast & Furious Presents: Hobbs & Shaw Movie Online Blu-ray or Bluray rips are encoded directly from the Blu-ray disc to 1080p or 720p (depending on disc source), and use the x264 codec. They can be ripped from BD25 or BD50 discs (or UHD Blu-ray at higher resolutions). BDRips are from a Blu-ray disc and encoded to a lower resolution from its source (i.e. 1080p to 720p/576p/480p). A BRRip is an already encoded video at an HD resolution (usually 1080p) that is then transcoded to a SD resolution. Watch Fast & Furious Presents: Hobbs & Shaw Movie BD/BRRip in DVDRip resolution looks better, regardless, because the encode is from a higher quality source. BRRips are only from an HD resolution to a SD resolution whereas BDRips can go from 2160p to 1080p, etc as long as they go downward in resolution of the source

disc. Watch Fast & Furious Presents: Hobbs & Shaw Movie FullBDRip is not a transcode and can fluxate downward for encoding, but BRRip can only go down to SD resolutions as they are transcoded. BD/BRRips in DVDRip resolutions can vary between XviD or x264 codecs (commonly 700 MB and 1.5 GB in size as well as larger DVD5 or DVD9: 4.5 GB or 8.4GB), size fluctuates depending on length and quality of releases, but the higher the size the more likely they use the x264 codec. Download Fast & Furious Presents: Hobbs & Shaw Movie HDRip

Fast & Furious Presents: Hobbs & Shaw is a 2021 American drama film directed by Fisher Stevens and written by Cheryl Guerriero. It stars Justin Timberlake as a former college football star, now an ex-convict, who starts to mentor a young boy (Ryder Allen); Alisha Wainwright, June Squibb, and Juno Temple also star. It was digitally released by Apple TV+ on January 29, 2021. The film received mixed reviews from critics, who praised the performances while noting its familiarity.

◇ STREAMING MEDIA ◇

Streaming media is multimedia that is constantly received by and presented to an end-user while being delivered by a provider. The verb to stream refers to the process of delivering or obtaining media in this manner.[clarification needed] Streaming refers to the delivery method of the medium, rather than the medium itself. Distinguishing delivery method from the media distributed applies specifically to telecommunications networks, as most of the delivery systems are either inherently streaming (e.g. radio, television, streaming apps) or inherently non-streaming (e.g. books, video cassettes, audio CDs). There are challenges with streaming content on the Internet. For example, users whose Internet connection lacks sufficient bandwidth may experience stops, lags, or slow buffering of the content. And users lacking compatible hardware or software systems may be unable to stream certain content. Live streaming is the delivery of Internet content in real-time much as live television broadcasts content over the airwaves via a television signal. Live internet streaming requires a form of source media (e.g. a video camera, an audio interface, screen capture software), an encoder to digitize the content, a media publisher, and a content delivery network to distribute and deliver the content. Live streaming does not need to be recorded at the origination point, although it frequently is. Streaming is an alternative to file downloading, a process in which the end-user obtains the entire file for the content before watching or listening to it. Through streaming, an end-user can use their media player to start playing digital video or digital audio content before the entire file has been transmitted. The term streaming media can apply to media other than video and audio, such as live closed

captioning, ticker tape, and real-time text, which are all considered streaming text. Elevator music was among the earliest popular music available as streaming media; nowadays Internet television is a common form of streamed media. Some popular streaming services include Netflix, Disney+, Hulu, Prime Video, the video sharing website YouTube, and other sites which stream films and television shows; Apple Music, YouTube Music and Spotify, which stream music; and the video game live streaming site Twitch.

◇ COPYRIGHT ◇

Copyright is a type of intellectual property that gives its owner the exclusive right to make copies of a creative work, usually for a limited time. The creative work may be in a literary, artistic, educational, or musical form. Copyright is intended to protect the original expression of an idea in the form of a creative work, but not the idea itself. A copyright is subject to limitations based on public interest considerations, such as the fair use doctrine in the United States. Some jurisdictions require fixing copyrighted works in a tangible form. It is often shared among multiple authors, each of whom holds a set of rights to use or license the work, and who are commonly referred to as rights holders. [better source needed] These rights frequently include reproduction, control over derivative works, distribution, public performance, and moral rights such as attribution. Copyrights can be granted by public law and are in that case considered territorial rights. This means that copyrights granted by the law of a certain state, do not extend beyond the territory of that specific jurisdiction.

Copyrights of this type vary by country; many countries, and sometimes a large group of countries, have made agreements with other countries on procedures applicable when works cross national borders or national rights are inconsistent. Typically, the public law duration of a copyright expires 50 to 100 years after the creator dies, depending on the jurisdiction. Some countries require certain copyright formalities to establishing copyright, others recognize copyright in any completed work, without a formal registration. In general, many believe that the long copyright duration guarantees the better protection of works. However, several scholars argue that the longer duration does not improve the author's earnings while impeding cultural creativity and diversity. On the contrast, a shortened copyright duration can increase the earnings of authors from their works and enhance cultural diversity and creativity.

◇ MOVIES / FILM ◇

Movies, or films, are a type of visual communication which uses moving pictures and sound to tell stories or teach people something. Most people watch (view) movies as a type of entertainment or a way to have fun. For some people, fun movies can mean movies that make them laugh, while for others it can mean movies that make them cry, or feel afraid. It is widely believed that copyrights are a must to foster cultural diversity and creativity. However, Parc argues that contrary to prevailing beliefs, imitation and copying do not restrict cultural creativity or diversity but in fact support them further. This argument has been supported by many examples such as Millet and Van Gogh, Picasso, Manet, and Monet, etc. Most movies are made so that they can be shown on screen in Cinemas and at home. After movies are shown in Cinemas for a period of a few weeks or months, they may be marketed through several other medias. They are shown on pay television or cable television, and sold or rented on DVD disks or videocassette tapes, so that people can watch the movies at home. You can also download or stream movies. Older movies are shown on television broadcasting stations. A movie camera or video camera takes pictures very quickly, usually at 24 or 25 pictures (frames) every second. When a movie projector, a computer, or a

television shows the pictures at that rate, it looks like the things shown in the set of pictures are really moving. Sound is either recorded at the same time, or added later. The sounds in a movie usually include the sounds of people talking (which is called dialogue), music (which is called the soundtrack), and sound effects, the sounds of activities that are happening in the movie (such as doors opening or guns being fired).

In the 20th century the camera used photographic film. The product is still often called a film even though there usually is no film. A genre is a word for a type of movie or a style of movie. Movies can be fictional (made up), or documentary (showing real life), or a mix of the two. Although hundreds of movies are made every year, there are very few that do not follow a small number of set plots, or stories. Some movies mix together two or more genres.

Action movies have a lot of exciting effects like car chases and gun fights, involving stuntmen. They usually involve goodies and baddies, so war and crime are common subjects. Action movies usually need very little effort to watch, since the plot is normally simple. For example, in Die Hard, terrorists take control of a skyscraper and ask for a big ransom in exchange for not killing the hostage workers. One hero somehow manages to save everyone. Action movies do not usually make people cry, but if the action movie is also a drama, emotion will be involved. Adventure Movies usually involve a hero who sets out on a quest to save the world or loved ones.

Animated movies use artificial images like talking cartoons to tell a story. These movies used to be drawn by hand, one frame at a time, but are now made on computers. Buddy movies involve 2 heroes, one must save the other, both must overcome obstacles. Buddy movies often involve comedy, but there is also some emotion, because of the close friendship between the buddies. Comedies are funny movies about people being silly or doing unusual things or being in silly or unusual situations that make the audience laugh. Documentaries are movies that are (or claim to be) about real people and real events.

They are nearly always serious and may involve strongly emotional subjects, for example cruelty. Dramas are serious, and often about people falling in love or needing to make a big decision in their life. They tell stories about relationships between people. They usually follow a basic plot where one or two main characters (each actor plays a character) have to overcome (get past) an obstacle (the thing stopping them) to get what they want. Tragedies are always dramas, and are about people in trouble. For example, a husband and wife who are divorcing must each try to prove to a court of law that they are the best person to take care of their child. Emotion (feelings) are a big part of the movie and the audience (people watching the movie) may get upset and even cry.

Film noir movies are 1940s-era detective dramas about crime and violence. Family movies are made to be good for the entire family. They are mainly made for children but often entertaining for adults as well. Disney is famous for their family movies. Horror movies use fear to excite the audience. Music, lighting and sets (man-made places in movie studios where the movie is made) are all designed to add to the feeling. Romantic Comedies (Rom-Coms) are usually love stories about 2 people from different worlds, who must overcome obstacles to be together. Rom-Coms are usually light-hearted, but may include some emotion. Comedy horror movies blend horror and comic motifs in its plots. Movies in

this genre sometimes use black comedy as the main form of humor. Science fiction movies are set in the future or in outer space. Some use their future or alien settings to ask questions about the meaning of life or how we should think about life. Science fiction movies often use special effects to create images of alien worlds, outer space, alien creatures, and spaceships. Fantasy movies include magical and impossible things that any real human being cannot do. Thrillers are usually about a mystery, strange event, or crime that needs to be solved. The audience is kept guessing until the final minutes, when there are usually [twists](#) in the plot (surprises). Suspense movies keep you on the edge of your seat. They usually have multiple twists that confuse the watcher. Western movies tell stories about cowboys in the western United States in the 1870s and 1880s. They are usually action movies, but with historical costumes. Some involve Native Americans. Not all films that are set in the American West are made there. For example, Western films made in Italy are called Spaghetti Westerns. Some films can also use Western plots even if they are set in other places.

Fast & Furious Presents: Hobbs & Shaw is a 2021 American drama film directed by Fisher Stevens and written by Cheryl Guerriero. It stars Justin Timberlake as a former college football star, now an ex-convict, who starts to mentor a young boy (Ryder Allen); Alisha Wainwright, June Squibb, and Juno Temple also star. It was digitally released by Apple TV+ on January 29, 2021. The film received mixed reviews from critics, who praised the performances while noting its familiarity.

◇ STREAMING MEDIA ◇

Streaming media is multimedia that is constantly received by and presented to an end-user while being delivered by a provider. The verb to stream refers to the process of delivering or obtaining media in this manner.[clarification needed] Streaming refers to the delivery method of the medium, rather than the medium itself. Distinguishing delivery method from the media distributed applies specifically to telecommunications networks, as most of the delivery systems are either inherently streaming (e.g. radio, television, streaming apps) or inherently non-streaming (e.g. books, video cassettes, audio CDs). There are challenges with

streaming content on the Internet. For example, users whose Internet connection lacks sufficient bandwidth may experience stops, lags, or slow buffering of the content. And users lacking compatible hardware or software systems may be unable to stream certain content. Live streaming is the delivery of Internet content in real-time much as live television broadcasts content over the airwaves via a television signal. Live internet streaming requires a form of source media (e.g. a video camera, an audio interface, screen capture software), an encoder to digitize the content, a media publisher, and a content delivery network to distribute and deliver the content. Live streaming does not need to be recorded at the origination point, although it frequently is. Streaming is an alternative to file downloading, a process in which the end-user obtains the entire file for the content before watching or listening to it. Through streaming, an end-user can use their media player to start playing digital video or digital audio content before the entire file has been transmitted. The term streaming media can apply to media other than video and audio, such as live closed captioning, ticker tape, and real-time text, which are all considered streaming text. Elevator music was among the earliest popular music available as streaming media; nowadays Internet television is a common form of streamed media. Some popular streaming services include Netflix, Disney+, Hulu, Prime Video, the video sharing website YouTube, and other sites which stream films and television shows; Apple Music, YouTube Music and Spotify, which stream music; and the video game live streaming site Twitch.

◇ COPYRIGHT ◇

Copyright is a type of intellectual property that gives its owner the exclusive right to make copies of a creative work, usually for a limited time. The creative work may be in a literary, artistic, educational, or musical form. Copyright is intended to protect the original expression of an idea in the form of a creative work, but not the idea itself. A copyright is subject to limitations based on public interest considerations, such as the fair use doctrine in the United States. Some jurisdictions require fixing copyrighted works in a tangible form. It is often shared among multiple authors, each of whom holds a set of rights to use or license the work, and who are commonly referred to as rights holders. [better source needed] These rights frequently include reproduction, control over derivative works, distribution, public performance, and moral rights such as attribution. Copyrights can be granted by public law and are in that case considered territorial rights. This means that copyrights granted by the law of a certain state, do not extend beyond the territory of that specific jurisdiction.

Copyrights of this type vary by country; many countries, and sometimes a large group of countries, have made agreements with other countries on procedures applicable when works cross national borders or national rights are inconsistent. Typically, the public law duration of a copyright expires 50 to 100 years after the creator dies, depending on the jurisdiction. Some countries require certain copyright formalities to establishing copyright, others recognize copyright in any completed work, without a formal registration. In general, many believe that the long copyright duration guarantees the better protection of works. However, several scholars argue that the longer duration does not improve the author's earnings while impeding cultural creativity and diversity. On the contrast, a shortened copyright duration can increase the earnings of authors from their works and enhance cultural diversity and creativity.

◇ MOVIES / FILM ◇

Movies, or films, are a type of visual communication which uses moving pictures and sound to tell stories or teach people something. Most people watch (view) movies as a type of

entertainment or a way to have fun. For some people, fun movies can mean movies that make them laugh, while for others it can mean movies that make them cry, or feel afraid. It is widely believed that copyrights are a must to foster cultural diversity and creativity. However, Parc argues that contrary to prevailing beliefs, imitation and copying do not restrict cultural creativity or diversity but in fact support them further. This argument has been supported by many examples such as Millet and Van Gogh, Picasso, Manet, and Monet, etc. Most movies are made so that they can be shown on screen in Cinemas and at home. After movies are shown in Cinemas for a period of a few weeks or months, they may be marketed through several other medias. They are shown on pay television or cable television, and sold or rented on DVD disks or videocassette tapes, so that people can watch the movies at home. You can also download or stream movies. Older movies are shown on television broadcasting stations. A movie camera or video camera takes pictures very quickly, usually at 24 or 25 pictures (frames) every second. When a movie projector, a computer, or a television shows the pictures at that rate, it looks like the things shown in the set of pictures are really moving. Sound is either recorded at the same time, or added later. The sounds in a movie usually include the sounds of people talking (which is called dialogue), music (which is called the soundtrack), and sound effects, the sounds of activities that are happening in the movie (such as doors opening or guns being fired).

In the 20th century the camera used photographic film. The product is still often called a film even though there usually is no film. A genre is a word for a type of movie or a style of movie. Movies can be fictional (made up), or documentary (showing 'real life'), or a mix of the two. Although hundreds of movies are made every year, there are very few that do not follow a small number of set plots, or stories. Some movies mix together two or more genres.

Action movies have a lot of exciting effects like car chases and gun fights, involving stuntmen. They usually involve 'goodies' and 'baddies', so war and crime are common subjects. Action movies usually need very little effort to watch, since the plot is normally simple. For example, in Die Hard, terrorists take control of a skyscraper and ask for a big ransom in exchange for not killing the hostage workers. One hero somehow manages to save everyone. Action movies do not usually make people cry, but if the action movie is also a drama, emotion will be involved. Adventure Movies usually involve a hero who sets out on a quest to save the world or loved ones.

Animated movies use artificial images like talking cartoons to tell a story. These movies used to be drawn by hand, one frame at a time, but are now made on computers. Buddy movies involve 2 heroes, one must save the other, both must overcome obstacles. Buddy movies often involve comedy, but there is also some emotion, because of the close friendship between the 'buddies'. Comedies are funny movies about people being silly or doing unusual things or being in silly or unusual situations that make the audience laugh. Documentaries are movies that are (or claim to be) about real people and real events.

They are nearly always serious and may involve strongly emotional subjects, for example cruelty. Dramas are serious, and often about people falling in love or needing to make a big decision in their life. They tell stories about relationships between people. They usually follow a basic plot where one or two main characters (each actor plays a character) have to 'overcome' (get past) an obstacle (the thing stopping them) to get what they

want. Tragedies are always dramas, and are about people in trouble. For example, a husband and wife who are divorcing must each try to prove to a court of law that they are the best person to take care of their child. Emotion (feelings) are a big part of the movie and the audience (people watching the movie) may get upset and even cry.

Film noir movies are 1940s-era detective dramas about crime and violence. Family movies are made to be good for the entire family. They are mainly made for children but often entertaining for adults as well. Disney is famous for their family movies. Horror movies use fear to excite the audience. Music, lighting and sets (man-made places in movie studios where the movie is made) are all designed to add to the feeling. Romantic Comedies (Rom-Coms) are usually love stories about 2 people from different worlds, who must overcome obstacles to be together. Rom-Coms are usually light-hearted, but may include some emotion. Comedy horror movies blend horror and comic motifs in its plots. Movies in this genre sometimes use black comedy as the main form of humor. Science fiction movies are set in the future or in outer space. Some use their future or alien settings to ask questions about the meaning of life or how we should think about life. Science fiction movies often use special effects to create images of alien worlds, outer space, alien creatures, and spaceships. Fantasy movies include magical and impossible things that any real human being cannot do. Thrillers are usually about a mystery, strange event, or crime that needs to be solved. The audience is kept guessing until the final minutes, when there are usually [twists](#) in the plot (surprises). Suspense movies keep you on the edge of your seat. They usually have multiple twists that confuse the watcher. Western movies tell stories about cowboys in the western United States in the 1870s and 1880s. They are usually action movies, but with historical costumes. Some involve Native Americans. Not all films that are set in the American West are made there. For example, Western films made in Italy are called Spaghetti Westerns. Some films can also use Western plots even if they are set in other places.
